

TECHNICAL DATA SHEET

Novatik® NATURE | STONE

The consistency in our production process and our commitment to developing new styles for our customer's roofs drives us to implement a brand new profile in our stone chip coated metal tiles range: **Novatik NATURE STONE**.

We designed **Novatik NATURE STONE** profile to recreate the unique image of the old traditional stone roofs. Our NATURA Stone panels are produced using premium quality steel, protected with an Aluminium Zinc layer on both sides and covered with natural volcanic stone chips. This protection of the steel we use, provides our product 8 times higher corrosion resistance than other metal tiles. Our **Novatik NATURE STONE** panels with their special design, offer a genuine look of the old traditional stone roofs, making your house extraordinary.
